(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner initiated the interview, in order to request clarifications regarding the drawings, that it is believed do not clearly enable one of ordinary skill in the art to make and use the claimed invention (see 35 U.S.C. 112, first paragraph). Specifically, Figures 10 and 12 reference numbers, such as 60(blunt end), 62(arc), 64(jamb), and other missing claimed structure needs to be included. In Figures 11 and 13 reference numbers need to be included to show the claimed structure of the invention. Also, Figures 11 and 13 fail to cooperate with Figures 10 and 12; wherein the blunt end of the tooth is aligned with the tanks outer wall in Figures 10 and 12 and the blunt end of the tooth is aligned with the tanks innermost wall in Figures 11 and 13. In Figure 15 reference numbers need to be included to show the claimed structure of the invention, such as the tooth, the blunt end, etc. Furthermore, Figures, 10-15 need to be properly cross sketched according to the MPEP 608.01 IX and in Figures 10 and 12 the fluid should be shown all over the inside of the container.
